

# District and schoolwide trend data

## 2012-2015

Anchorage School District  
Assessment & Evaluation  
August 2015

Performance Targets

*Proficiency:* The proficiency cut score is 300 on the SBA in reading, writing and math.

*ASPI Growth:* 90 percent of students will demonstrate a year's growth in reading, writing and math as calculated using ASPI scores.

*AIMSweb Growth (Single target method):* 90 percent of students will demonstrate a year's growth in reading and math (2014-2015 reading and math).

*AIMSweb Growth (banded target method):* 90 percent of students will demonstrate a year's growth in reading and math (2014-2015 reading and math).

*Attendance:* 100 percent of students attending school 90 percent of the time.

Note: The calculation for attendance by 90 percent of the days enrolled was changed in 2014 to exclude summer leavers, summer dropouts and adult graduates.

*Students on-target:* Percentage of grade 7-12 students on-target

Note: Grade 6 students at Begich, Clark and Mirror Lake were included in the data

*Out of school suspensions:* Percent of grade 7-12 students suspended per school population

Note: Grade 6 students at Begich, Clark and Mirror Lake were included in the data

AIMSweb growth calculations

In order to be eligible for either growth calculation, students must have pre-test (fall or winter) and post-test (spring) scores.

Single target method

1. The average weekly growth (rate of improvement) is calculated for each student.
2. Students in each grade level are assigned one growth target based on national norm data. All students were assigned the same target.
3. Students who met the growth target made at least one year of growth.

Banded target method

1. The average weekly growth (rate of improvement) is calculated for each student.
2. Based on pre-test scores, students were placed into one of five performance bands: very high, high, average, low, very low.
3. In each grade level, there was a separate growth target for each performance band.
4. Students who met the growth target made at least one year of growth.

ASPI growth

To be included in the growth calculation, students must receive a valid subject score on the SBA for two consecutive years, be enrolled in the same school for the full academic year and progress one grade level.

Students on-target

Middle school students who are on-target to be grade 9 ready:

- For full time middle school students, on-target means the students have completed a minimum of 12 courses during the school year.
- For middle school students who only enrolled in the second semester, on-target means the students have completed a minimum of 6 courses.

High School students who are on-target to meet graduation requirements:

- For high school students, on-target means their cumulative credits at the grade level have met the following threshold

Grade	Minimum cumulative credits earned
9	5.5
10	11
11	16.5
12	22.5

**Additional Information:**

Use of N/A - N/A indicates that there is no data available due to one of the following reasons:

- The grade level is not tested (e.g. Only students in grades 3-10 were tested on the SBA).
- The data does not exist for that grade level.
- The grade level is not served (e.g. Bartlett High School only serves students in grades 9-12).
- The assessment was not administered at the school.
- Zero students were included in the AIMSweb growth calculation due to students missing the pre or post assessment.
- Zero students were included in the ASPI growth calculation due to one or more of the following: students not having a valid subject score on the SBA for two consecutive years, students not enrolled at the same school for the full academic year and/or students who did not progress one grade level.

Use of asterisks (\*) - An asterisks (\*) indicates that the data has been suppressed to protect student privacy and follow FERPA and DEED guidelines.

The Alaska Department of Education and Early Development (DEED) has reporting guidelines that schools and districts must follow in order to protect student privacy. These protocols require that student assessment data be suppressed using rules set out by the state.

Suppressions occur when:

- The total number of students in the proficient or not proficient levels are a 0, 1 or 2.
- The total number of students tested is less than five.
- When either circumstance occurs, the raw data is replaced with an asterisks (\*)
